A Timeless Collection of Freestanding Baths

We have tried and tested all of our baths for comfort and quality. You can be rest assured that your ADP bath will be as comfortable as it is beautiful.

Our European engineered baths bring you the highest quality design and attention to detail.

All of our baths are made with a Solid Cast Marble core which preserves the water temperature longer than other acrylic alternatives, providing you with a pleasant, long-lasting bath.

How to choose a bath that's right for you?

SIZE

Consider how much space in your bathroom you have for a bath. Also consider who will be using the bath most regularly. Will the kids be in it every night, or will it be used for a leisurely soak on the weekends?

STYLE

Your bath should be a continuation of the style in the rest of your bathroom. Whether you prefer a contemporary or classic look, showstopping or timeless, we have a bath to match your style.

COMFORT

All of our baths have been tried and tested for comfort and quality. We offer a range of baths in different shapes to suit various comfort preferences. Comfort is a personal choice, so explore the full range of options.

FINISH

Our range encompasses both Matte and Gloss finish baths. Matte finish baths make an elegant statement piece in your bathroom, while Gloss finishes are timeless and perfect for everyday family life.

AN IMPORTANT NOTE ON BATHROOM VENTILATION

Good ventilation will save you thousands of dollars and keep your family healthy - mould can be a huge problem in bathrooms if they're not properly ventilated.

Moisture can be the root of all wet area products breaking down and failing, in particular your vanity and mirror. These products are usually water resistant not waterproof so it's important moisture does not build up which will mean your products will last longer, saving you money. Good ventilation is also key to achieve lower humidity in the room which will minimise bacteria growth and prevent mould and mildew. You'll have less mildew on your grout, walls and ceilings, and fewer mould spores to threaten your respiratory health.

Signs of poor ventilation include black spotting on mirrors, paint starting to flake on the ceiling, bubbling of paint coatings on fixtures, and furniture swelling. Evidence of mould or mildew is also a good indicator that your ventilation is not adequate.

The best sign that your ventilation is sufficient is that the mirror doesn't steam up and the tiled walls aren't wet. The best way to achieve this is to have a good exhaust fan that is correctly sized for the space, to do this you need approximately 50 cfm per toilet and 50cfm per shower or bath. Run the fan every time water is being used in the bathroom and run it for around 15 minutes after you shower. If you have a bathroom window, opening that daily (even in the chilly winter months) in addition to using the exhaust fan will help to keep your bathroom fresh and mould-free.

CARE & MAINTENANCE

If you cannot identify basin, top or cabinet material of your product, contact your merchant or see product information at www.adpaustralia.com.au.

TIPS

- ADP products are produced from materials that are well suited to the bathroom, however it is important that your bathroom has sufficient ventilation to avoid excessive moisture. High humidity will lead to permanent dampness and mould, resulting in deterioration of the materials.
- Care must always be taken to dry any excessive moisture or water spillage.

CABINETS

- To maintain the finish on your cabinet use only a soft cloth and weak solution of non abrasive detergent.
- To remove scratches, marks, etc. on two pack polyurethane, rub gently with car cutting compound, car polish or household brass/silver cleaner.
- Goods used in construction are water/moisture-resistant, but not water-proof.
- All cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage.

CAST MARBLE & ACRYLIC

- To maintain the finish on your Cast Marble or Acrylic top use only a soft cloth and weak solution of non-abrasive detergent.
- To remove scratches, marks, etc. rub gently with car cutting compound, car polish or household brass/silver cleaner.
- Cast Marble basins and tops have a maximum water temperature of 70°C, to avoid thermal shock - heat damage or crazing.
- Acrylic tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

CERAMIC BASINS AND TOPS

- To maintain the finish on your ceramic top use only a soft cloth and weak solution of non abrasive detergent.
- Due to the glazed surface of ceramic tops, scratches cannot be repaired or removed.
- Due to ceramic being a handcrafted product that is fired at high temperatures, some visual distortion may occur. This is not a defect but can be seen to add to the beauty of the product.
- Ceramic basins and tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

SOLID SURFACE / CHERRY PIE / FRIDAY HYBRID QUARTZ / CAESARSTONE

- Wipe clean with a soft damp cloth or sponge.
- For basic stains clean with mild detergents. For **gloss and semi-gloss** surfaces you can use a non abrasive polish or Brasso. For **matte** surface use a scourer pad or scotch bright to maintain the matte finish.
- Cherry Pie, Friday Hybrid Quartz™ and Caesarstone® benchtops have excellent heat and chemical resistant properties compared to other surfacing products, however to preserve the surface and protect against damage from heat, do not place hot items directly on the surface. Even though Cherry Pie, Friday™ and Caesarstone® can withstand high temperatures, prolonged periods or extreme heat can cause permanent damage.
- Solid Surface basins and tops have a maximum water temperature of 65°C, to avoid thermal shock - heat damage or crazing.

MIRRORS

FOR BEST RESULTS - use a slightly moistened microfibre cloth to remove dry dirt or grime, then buff clean with dry microfibre cloth or use a soft dry cloth with a tight weave (which is more soft and non-abrasive). This will leave you with a clean, smear-free finish. By using alkaline (ammonia) or acid (vinegar) based products you not only risk damaging the silvered backing of the mirror, but also tend to leave behind streaks and smears.

DO NOT USE WINDEX or other ammonia-based cleaning products such as glass cleaner. These may erode the mirror's silver backing. Be sure to read the label of any such cleaning products before use.

PROTECTION AGAINST 'BLACK-SPOTTING' - Alkaline, acid and moisture elements can cause the silvered backing of a mirror to darken, this is usually referred to as 'black-spotting'. **An easy way to protect your mirror against black-spotting is to ensure your bathroom is well ventilated** and regularly oil any exposed edges (i.e. polished or bevelled edges), using non-petroleum based oils (eg. sewing machine oil). This will act as a seal to protect against such elements. Always remember to keep your mirror dry and wipe off any water, moisture or steam. Don't forget to use the exhaust fan or open a window if you have one!
